EXPERIENCE

Bond Latin Gallery (http://www.bondlatin.com)
Implementation of new features and maintenance of freelance client's online presence.
- Leveraged Google CSE to enable search feature
- Updated CSS legacy code for mobile & tablet responsiveness
- Implemented higher-visibility method for visitors to contact gallery

General Assembly Front End Web Development Teaching Assistant
Assist in 10-week course teaching best practices in HTML, CSS & JavaScript & helping troubleshoot & debug students' code.

What's the Fuss (https://whatsthefuss.herokuapp.com)
A full-stack RESTful CRUD app to report incidents in a user's vicinity, built in 1 week.
- Implemented app's MVP feature: JavaScript geolocation in conjunction with GoogleMaps API
- Coded variable timeline for events displayed
- Implemented file-upload solution with Carrierwave & support for AWS with Fog

Vagabond (https://glacial-ridge-30784.herokuapp.com)
Full-stack RESTful travelogue app built with Ruby on Rails, full CRUD functionality.
- MVP scope developed in a pair-programming environment
- Implemented BCrypt to safely handle and hash passwords
- Responsible for securing app's routes
- Configured mailers (as proof of concept, in our development app)

Chronologick (https://chronologick.herokuapp.com)
Front end solo project experimenting with self-taught technologies.
- Built an OOP timer/countdown app with React and Webpack in 3 days
- Incorporated TDD principles, teaching myself Mocha & Karma in the process
- Employed modular SCSS to ensure scalability
- Ideated entire front end, customizing Foundation to build a cohesive UI

EDUCATION

General Assembly Web Development Immersive
2016
Built full-stack web applications in Rails and MEAN stack, independently and in groups. Applied agile development practices and OOP principles.

University of Texas at Austin
BA Spanish Literature & Government 2003
